BUILD. MAINTAIN. SUPPLY.

Trading, contracting and services in Qatar.

A clear starting point.

HBA is a new Qatar-based business bringing building and construction, facilities maintenance, air-conditioning and refrigeration, and project supply under one identity.

Our approach starts with understanding the requirement, defining the proposed scope and agreeing practical arrangements before work or supply is confirmed.

COMPANY IDENTITY

Hamza Bin Abdullah for Trading, Contracting and Services W.L.L.

One identity. Connected services.

A practical overview of HBA's service areas.

01 / CONTRACTING

Building and construction requirements, alterations and fit-out enquiries. Share drawings, location, quantities and required finishes to help define the proposed scope.

02 / FACILITIES

Planned upkeep and corrective building-maintenance requirements. Share the property type, systems involved, photographs and access arrangements.

03 / HVAC & REFRIGERATION

Cooling-system installation, servicing and maintenance enquiries. Share equipment details, the number of units, symptoms and existing service information.

04 / MATERIALS & PROJECT SUPPLY

BOQ review and procurement enquiries. Share quantities, specifications, preferred brands, delivery location and target dates.

PLANNED MAINTENANCE

Annual maintenance proposals can define covered assets, visit frequency, reporting, support arrangements, inclusions and exclusions. The final coverage is agreed in the written proposal.
